SKILLS

Languages
TypeScript, JavaScript, Python, Solidity, Cairo, Clarity, CashScript, Rust

Blockchain
Solana, Stacks, Starknet, Bitcoin Cash, Tempo L1, Somnia, EVM, Monad

Web
Next.js, React, Node.js, Supabase, Vercel, Railway

Contracts
Foundry, Clarinet, Scarb, Viem, ethers.js, Hardhat

Payments
x402, MPP, Stripe Bridge, TIP-403

Embedded
IoT, Raspberry Pi, MQTT, sensor integration

ACHIEVEMENTS

- Nine-time hackathon winner across blockchain infrastructure tracks.
- Live mainnet deployments on Stacks, Bitcoin Cash, Starknet, and Somnia.
- Developer tooling across six blockchain ecosystems.

INTERESTS

- Intent & solver infrastructure
- UTXO covenant engineering
- Autonomous agent tooling
- Embedded systems
- Developer relations

TIMOTHY POPOOLA

Blockchain Protocol Engineer

Protocol engineer building production blockchain infrastructure across Solana, Stacks, Starknet, Bitcoin Cash, Tempo L1, Somnia, and EVM. Nine-time hackathon winner with live mainnet deployments and a track record of shipping protocol-depth systems under deadline.

SELECTED PROJECTS

Remlo — Borderless Enterprise Payroll Protocol

Founder & Lead Engineer · 2026 – Present

remlo.xyz

- Built production payroll and yield routing on Tempo L1 with Stripe Bridge fiat rails for cross-border stablecoin payroll.
- Implemented MPP and Lit Protocol PKP signing on Solana for autonomous agent payroll transactions.
- Architected full frontend, backend, and smart contract layer; extended to Solana for Colosseum Frontier Hackathon.

LICTOR — Autonomous Trading Desk on Somnia

Founder · 2026

frontend-production-afdba.up.railway.app

- LLM agents parse plain-English trade mandates on Somnia mainnet, monitoring signal sources via JSON API agents.
- Uses inferToolsChat where the model yields swap calldata directly back to the contract for on-chain execution.

Lend402 — JIT Micro-Lending for AI Agents

Founder · 2026

lend402.xyz

- Live Stacks mainnet protocol providing just-in-time micro-loans to AI agents over the x402 payment standard.

BlindMarkets — Privacy-Preserving Bitcoin Intent Execution

Founder · 2026

blindmarkets.xyz

- Starknet-based intent execution protocol in Cairo for private Bitcoin order flow with constraint-based settlement.

FlowGuard — BCH-Native Payment Streaming

Founder & Builder · 2025

flowguard.cash

- Treasury and payment streaming on Bitcoin Cash using CashScript covenants for vesting and automated payouts.

RouteDock — Unified Agent Payment Execution Layer

Builder · 2026

- Routing layer unifying Stellar, x402, and MPP payment standards for the Stellar Hacks: Agents hackathon.
